

AGRU OIL AND GAS CONTAINMENT SOLUTIONS

For more information about Agru America
and our products, visit agruamerica.com

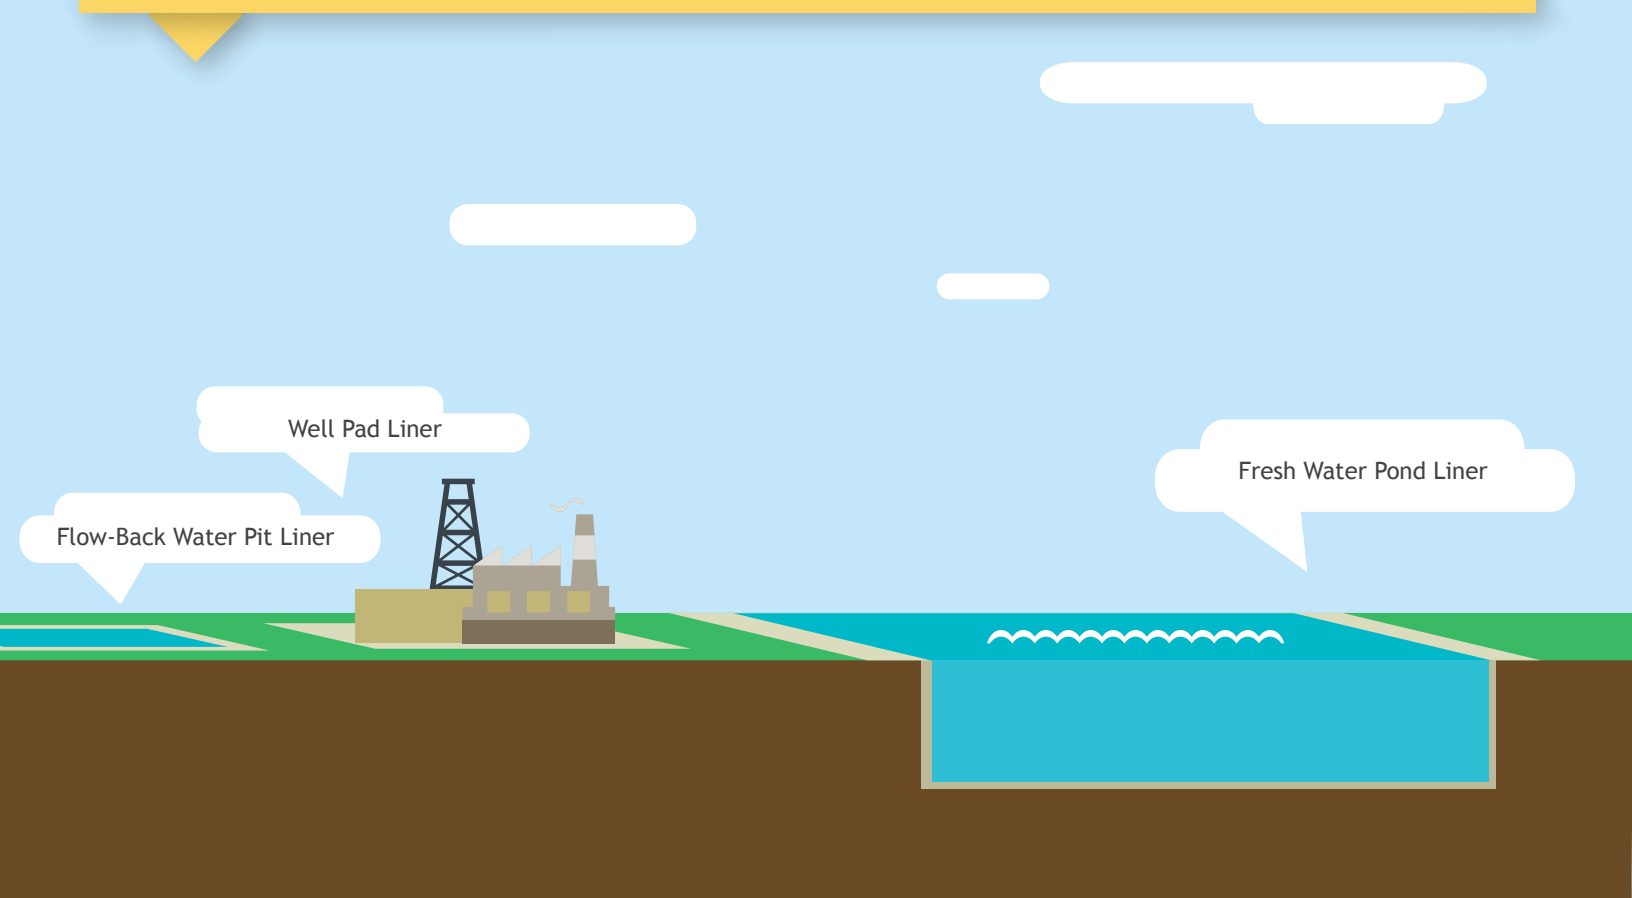

By understanding our clients' application-specific challenges, Agru America has built a reputation providing superior geosynthetic solutions. For more than 25 years, we have been the world's leading manufacturer of flat die extrusion geomembranes. We believe standing still is the same as falling behind. This is why Agru America is focused on market-oriented innovation to develop new products that solve our clients' needs.

Geosynthetic Applications

- Regulated Centralized Impoundments & Impoundment Closures
- Flow-back and Production
- Water Ponds & Covers
- Well Pad Liners

Agru Geosynthetic Solutions for Oil & Gas Extraction

Agru Conductive Smooth Liner® and MicroSpike®

An electrically conductive bottom layer allows spark testing to be performed, ensuring a quality installation. MicroSpike Conductive provides a textured surface on one or both sides for interface shear strength and better surface traction for the safety of workers.

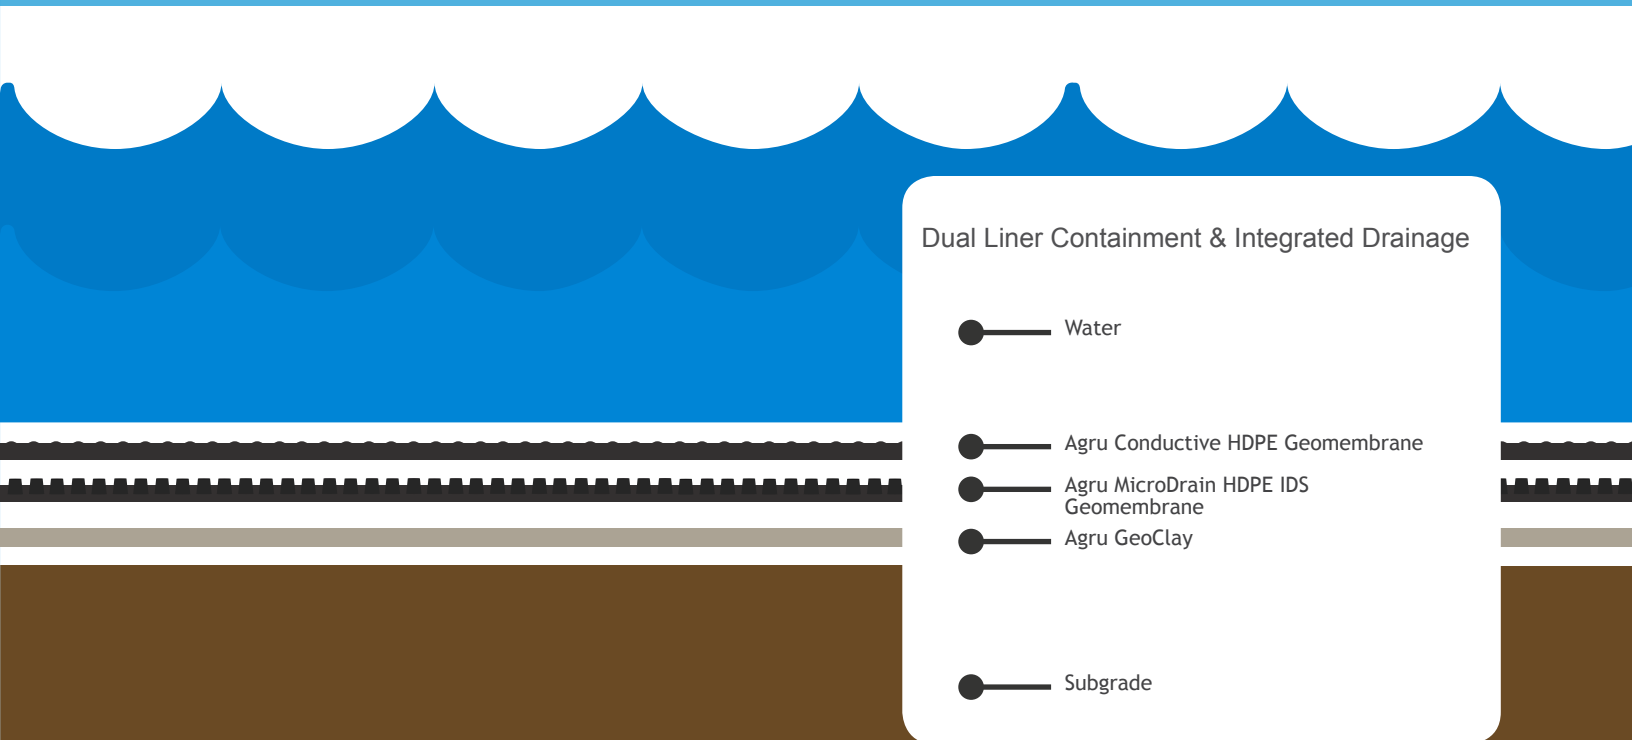

Agru Integrated Drain System (IDS) Geomembranes

Designed for double-lined containment projects where leak detection is critical, the Agru IDS Geomembranes eliminate the need for a separate geonet or geocomposite drainage layer, which can provide significant savings. Additionally, the all-polyethylene product allows for easy recycling and/or less disposal cost when the project is complete.

Agru GeoClay®

A needle-punched geosynthetic clay liner comprised of a uniform layer of granular bentonite encapsulated between two geotextiles.

Dual Liner Containment & Integrated Drainage
