

Steel to PE Category 1 Transition Fittings

Carbon Steel to PE Weld End Transition Fittings Black PE Pipe

- Electrostatically applied epoxy coating for durable corrosion resistance.
- Category 1 – Transition joint is stronger than the PE pipe.
- O-Ring seals for added leak protection.
- All steel welds are performed by an automated welding process to insure quality and consistency
- All welds are 100% air tested to insure good weld integrity.
- Meet all requirements for ASTM F1973 and ASTM D2513.
- Can be custom manufactured using pipe that meets customer specifications.
- Steel Pipe Spec: A53 Grade B, API5L
- PE Pipe Spec: ASTM PE 4710
