

CLEANSEAM[®]

INTEGRATED GEOSYNTHETIC
RELEASE FILM TO ENSURE
THE CLEANEST SEAMING AREA
IN THE FIELD

CLEANSEAM[®] eliminates or greatly reduces the potential for fine soils, waste materials, and stockpile dust from coming into contact with seaming areas during or prior to geosynthetic installation.

KEEP THE WELD EDGE CLEAN

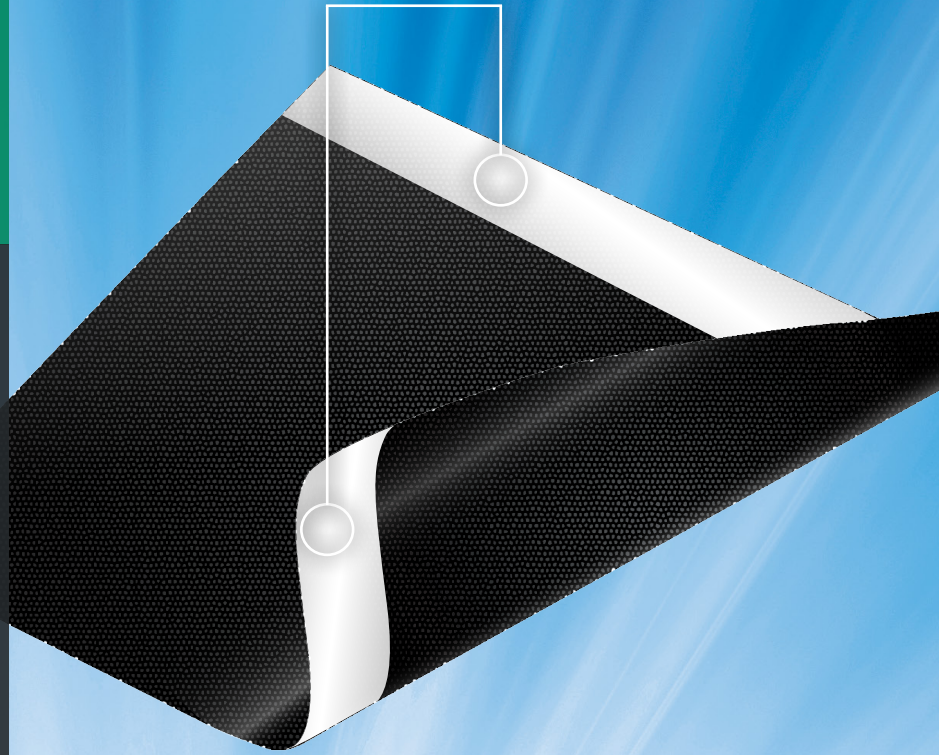

- Mitigate the risk of particle buildup by protecting the geomembrane weld edges from exposure to field conditions

MORE EFFICIENT SEAMING

- Simply remove the protective strip directly before seaming occurs; CleanSeam leaves no sticky residue behind

AVAILABLE ON ALL AGRU LINERS

- CleanSeam can be configured on all AGRU geomembrane liners, including AGRU Smooth & MicroSpike[®], Super Gripnet[®], MicroDrain[®], and AGRU Drain Liner[®]
